MONITOR FILTERS

Light tint glass allows more light to transmit through from the monitor (45% vs 31% for standard/medium tint) for improved visibility and contrast. Glare reduction up to 99% (meets American Optometric Association specifications). Blocks 99.9% of ELF/VLF E-field radiation. Eliminates static charges and dust build up when properly grounded. Can reduce eyestrain and headaches related to monitor use. Flat frame style fits both LCD and CRT monitors. Two sets of hanger arms included to meet most monitor styles. Available in Black or Putty frame.

| <u>MFG / ITEM #</u> | <u>DESCRIPTION</u> | <u>UNIT</u> | <u>LIST PRICE</u> |
|---------------------|------------------------------------|-------------|-------------------|
